ATHENA ACADEMY · LIVE ONLINE LEARNING

SC-900 · Microsoft Security, Compliance, and Identity Fundamentals

Build a clear foundation in identity, cloud security and compliance across Microsoft Azure and Microsoft 365.

We work with Microsoft Learn, live online classes and guided activities. The eight-session plan connects the current exam objectives with practical scenarios.

USD 500	24 h	4 h + 30 min
Final price per person, per course. Applicable taxes and one exam attempt included. The same total applies to every payment method.	24 hours of live online classes	4 hours of guided activities + One private 30-minute consultation

November 2026 cohort | November 21, 2026 - January 23, 2027

Live class time: 20:00-23:00 UTC-06:00 | Live online classes

This cohort is taught in Spanish. English and Portuguese pages and guides are translations of the same cohort. Confirm any access requirements before enrolling.

No class on December 26, 2026 or January 2, 2027.

All live sessions use the fixed UTC–06:00 offset. Check the equivalent time in your location before enrolling.

One Pearson VUE attempt at the course's Microsoft certification exam

Who this course is for

For technology professionals, students and business stakeholders who need to understand Microsoft security, compliance and identity capabilities.

Before you join

General IT knowledge and an understanding of networking, cloud computing, Azure and Microsoft 365 are recommended.

What you will work on

- Explain security, compliance and identity concepts.
- Describe Microsoft Entra authentication, access management, identity protection and governance.
- Recognize Azure security controls, Defender for Cloud, Sentinel and Defender XDR.
- Describe Microsoft Purview information protection, compliance, audit and investigation capabilities.

Payment and enrollment questions

Cash and bank transfer are available. Ask about enrollment instructions and the applicable payment arrangements before paying.

BAC Tasa Cero and Credix payment plans are available in 3 or 6 monthly installments, subject to participating cards, issuer conditions, availability and approval. Approval is not guaranteed.

One Pearson VUE exam attempt is included; retakes are not included. Before enrolling, confirm exam eligibility, booking region, language, scheduling availability and the conditions of that attempt. Certification is awarded by Microsoft after its requirements are met.

SC-900 | Your eight-session learning plan

20:00-23:00 UTC-06:00 | No class on December 26, 2026 or January 2, 2027.

01 **2026-11-21**	**Security, compliance and identity concepts** Explore shared responsibility, defense-in-depth, Zero Trust, encryption, hashing, GRC, authentication and authorization. **Guided practice:** Distinguish the controls and responsibilities in a sample business scenario.
02 **2026-11-28**	**Microsoft Entra and identity types** Describe directory services, Microsoft Entra ID, federation, workload identities and hybrid identity. **Guided practice:** Map people, applications and services to identity types and trust boundaries.
03 **2026-12-05**	**Authentication, access and identity governance** Explore MFA, password protection, Conditional Access, roles, access reviews, PIM and identity protection. **Guided practice:** Choose an identity control for a stated access or governance requirement.
04 **2026-12-12**	**Azure infrastructure security** Compare segmentation, NSGs, Azure Firewall, WAF, DDoS Protection, Bastion and Key Vault at a foundational level. **Guided practice:** Identify which infrastructure controls address specific threats and access paths.
05 **2026-12-19**	**Cloud security posture and protection** Explore Defender for Cloud, cloud security posture management, recommendations and workload protection. **Guided practice:** Read sample recommendations and distinguish posture management from threat protection.
06 **2027-01-09**	**Security operations and threat protection** Describe Sentinel, SIEM, SOAR and the Defender XDR family across endpoints, identities, cloud apps and productivity services. **Guided practice:** Match a detection or response scenario to the relevant Microsoft capability.
07 **2027-01-16**	**Purview: information protection and lifecycle** Explore classification, sensitivity labels, DLP, records management and retention capabilities. **Guided practice:** Select protection and retention controls for sample information.
08 **2027-01-23**	**Compliance, investigation and integrated review** Review Service Trust Portal, privacy principles, Compliance Manager, insider risk, eDiscovery and audit. Revisit the exam domains. **Guided practice:** Analyze an integrated compliance scenario and complete an original knowledge check.
